

## CUTTING

## SPREADING

## UPGRADE YOUR S SERIES WITH A REDEKOP MAV

Redekop's Maximum Air Velocity (MAV) Straw Chopper is a breakthrough in crop residue management. The MAV's revolutionary design uses two separate zones; one for cutting and the other for spreading, rather than a traditional rotor design that depends on the cutting blades to also spread the straw. This unique design allows the Redekop chopper to maximize the spread performance of your combine while delivering the finest residue cut in the industry.

BENEFIT:	DESCRIPTION:
<b>SUPERIOR CUTTING CAPABILITY</b>	The S Series Chopper gives you an added 4 rows for a total of 8 rows (96 blades) of cutting capability, delivering premium residue management capability in the toughest conditions.
<b>WIDER MORE EVEN SPREAD</b>	Redekop's MAV system allows you to spread your straw and chaff evenly across the width of your cutter bar, eliminating the need for the factory powercast system. With the optional wide spread kit, you can spread up to 45 feet.
<b>SUPERIOR BLADES</b>	Carbide coated self-sharpening reversible blades. This gives you a longer lasting blade with better performance versus the factory blades.
<b>TIGHT KNIFE SPACING</b>	Provides you with a finer cut over the factory chopper.
<b>BREAKAWAY KNIFE BAR</b>	The knife bar is designed to "break away" when a solid foreign object comes through the chopper as compared to the rigid knife bar in the factory chopper.
<b>EASY TO INSTALL</b>	Less than three hours to do the install as we utilize the current factory mounting points.
<b>UPGRADED DRIVE SYSTEM</b>	Redekop provides an upgrade to your existing drive system increasing the RPMs from 2400 to 2900 which maximizes the ability of the system to chop and spread the residue.
