

REDEKOP SEED CONTROL UNIT

NEXT LEVEL WEED CONTROL

INNOVATIVE IN-FIELD SOLUTION

Redekop's SCU combines the highest weed seed kill rate with the best fit and residue finish in the industry.

Destroy up to 98% of the harvestable weed seeds in a single pass with Redekop's SCU. The most effective and cost-efficient weed control for pre-plant and resistant weeds, the SCU easily integrates into most combines for a seamless solution.

UPGRADE YOUR COMBINE WITH A REDEKOP SCU

✓ FOR RESISTANT WEED CONTROL

A mechanical weed control tool, the SCU kills up to 98% of harvestable weed seeds to help manage and reduce the risk herbicide-resistant weeds.

✓ TO GIVE YOUR CROP THE BEST START NEXT SPRING

Managing emerging weed populations at harvest decreases spring seedbed weed pressure, reducing overall emerging crop competition for moisture and nutrients.

✓ AS AN INVESTMENT FOR YOUR FIELD AND FARM

The SCU is latest innovation to enhance the functionality of your field equipment, while controlling harvestable weeds seeds that rob crops of yield and quality.

Redekop's SCU is one of two Harvest Weed Seed Control solutions. The EMAR Chaff Deck is also available through Redekop Manufacturing. Learn more about Redekop's advanced weed control options online at redekopmfg.com.

REDEKOP SEED CONTROL UNIT

ADVANCED INTEGRATION

The SCU's fully integrated design means you can leverage your own equipment, enhancing your combine to become the most effective weed seed control tool. The system's monitoring unit also completely integrates into your combine's existing residue drive and display systems, and its optimized design is safe and easy to use.

- ✓ Advanced weed seed destruction combined with the best fit and finish in the industry
- ✓ Seamless integration with most combine units
- ✓ Effective option to quickly and easily bypass the mill when not required

WHAT MAKES THE REDEKOP SCU DIFFERENT FROM OTHER WEED SEED MILLS?

- ✓ High volume material
- ✓ Access to sieve area without completely removing the unit

PERFORMANCE MADE EASY

MADE TO WORK

The SCU's integrated controls and simple switch allows you to adapt your combine to varying field conditions, reducing downtime and enhancing operation efficiency.

MADE TO LAST

Created with parts that are designed for long life and extended service, the SCU is built for long-lasting performance with minimal maintenance costs.

MADE FOR YOUR FARM

The SCU is the latest innovation to enhance the functionality of your field equipment, while controlling harvestable weeds seeds that rob crops of yield and quality.
